

*Neuro Sense Plant Stem Cell Rejuvenation Anti-Aging Fusion* is the No. 1 dermatologist-recommended treatment for anti-aging. This Plant stem Cell anti-aging fusion with its star medicinal herbal ingredients promotes skin renewal and enhances collagen production to visibly improve firmness and elasticity. It is clinically proven to noticeably reduce the appearance of fine lines, wrinkles, and age spots. It's a must-have for anyone who is serious about radiant, youthful-looking skin. This ultimate state-of-the-art anti-aging formula with nature's proven antioxidant and vitamins mixed with apple stem cell, cucumber stem cell, maple-leaf stem cell, CQ10, Hibiscus stem cell, Centella asiatica stem cell, and Vitamin E and added pure Shea butter as a non fragrance and non alcohol anti-aging cream. These rich blend formulas help improve the appearance of delicate facial skin. Your Skin Will Love and appreciate these super anti-aging cream, leaving your face softer with a supper youthful glow with no signs of greasiness.

# The Science

## **Neuro Sense Plant Stem Cell Rejuvenation Anti-Aging Fusion Anti-Aging Properties of Plant Stem Cell and the Science behind it**

The main focus of Neuro Sense Healthy Mind and beauty is to developing a revolutionary synthesis that infiltrates deep in cellular structure of the skin working at the cellular level to increase the rejuvenation and production of collagen and elastin. According to the published recent studies plant stem cells show outstanding anti-aging properties, as they can, among other activities, stimulate fibroblasts to synthesise collagen, which, in turn, stimulates skin regeneration. One of the most important agents which give anti-aging properties to plant stem cell extracts is kinetin.

Like humans, plants also have stem cells. With the modern technology now the cells from the stems of plants can be accurately extracted and used for skin care. According to the current studies plant stem cells from certain medicinal herbs such as *Centella asiatica*, hibiscus, and maple-leaf show outstanding anti-aging properties since they have the regenerative ability at the cellular level and the capability to stimulate fibroblasts to production of collagen. Fibroblasts are the major cells responsible for the production of collagen and collagen (protein made from amino acids, specifically glycine, proline, hydroxyproline, and arginine) are the main factors for skin regeneration. Collagen production occurs at the cellular level both intracellularly (within the cells) and extracellularly (outside the cells). In other words, Nourishing the skin from within by applying stem cells properties of such medicinal herbs combined with vitamins (such as VE), and coenzyme like CoQ10 to the skin may enhance the ability of the skin cells to self renew and growth leading to cells rejuvenation, regeneration, and restoration.

Directions: Apply a small amount gently to the any wrinkled facial spots such as under and around the eyes, mouth, forehead, cheeks and neck. Gently massage in a circular motion with NeuroSense Facial Iontophoresis Stimulator. Use at night before bed and in the morning with or without make up for best results. These non-greasy Serums and creams are suitable to wear underneath sunscreen and make-up.

## Supper Medicinal Herbal (SMH) Plant Stems Cell Ingredients:

SMH /Stem Cells	FineLines/Wrinkles	Regeneration/Restore	Collagen/Production	Description
Apple	Reduction	Enhancement	Increasing	Clinically proved to have anti-aging properties, to improve skin elasticity, to promote vitality and longevity of facial skin
Centella asiatica	Reduction	Enhancement	Increasing	Centella Asiatica (gotu kola) is rich in amino acids, beta carotene, fatty acids, and phytochemicals. It boosts antioxidant activity, blood circulation, and skin tightening collagen synthesis.
Cucumber	Elimination	Enhancement	Increasing	Cucumber stem cells loaded with anti-aging properties such as silica (antecedent to collagen), Elastin, magnesium, potassium, vitamins A, B1, and C, and biotin. These are the same vitamins that help keep the skin wrinkle free and looking young and vibrant.
CQ10				
Hibiscus	Elimination	Enhancement	Increasing	Anti-aging properties. It is known as the <b>Botox plant.</b> With its <b>anti-inflammation effect helps the</b> skin firming, tightening, and can diminish lines and wrinkles, dark spots and also lifts sagging skin.
Maple-leaf	Elimination	Enhancement	Increasing	Maple leaf acts like 'Botox' to the skin without injection. It penetrates deep into skin and could prevent wrinkles and fine lines. It also has anti-inflammation effect and lightens dark spots.
Vitamin E	Reduction	Enhancement	Increasing	Vitamin E (also known as tocopherol) is a proven very effective skin care vitamin that hydrates the lower layer of skin. It's an antioxidant by nature and thus helps skin in preventing signs of premature aging.
Vitamin A	Reduction	Enhancement	Increasing	Vitamin A has two types "retinoids and carotenoids" that are responsible production of skin cells along with fibroblasts, which are skin tissues that are responsible for keeping the skin tight and wrinkle-free.
Aloe Vera	Reduction	Enhancement	Increasing	As an antioxidant, Aloe Vera works hard to combat free radicals. Ultimately, this helps to slow the aging appearance of the skin. And early studies show that it can provide anti-aging effects on the skin by improving

collagen production and skin  
elasticity.
